Operational Tips
(extensive on-board meter and sensor info)

Display measurements in realtime. Access "sensor tips", IAQ documents and guidelines on-screen. Store "snapshot" readings. "Trend" log over hours/days/weeks. Document each measurement location with text, graphic, even audio notes. Also attach photos, Word field forms, time-stamped event notes, calibration history and other info to data files.

- Optimize the balance between ventilation energy efficiency and occupant performance (and health)
- Easily establish baseline data & respond immediately to complaints
- Test conditions before and after building modifications
- Screen for additional testing requirements
- Track down (bloodhound) pollutant sources

DirectSense probes can also plug directly into a Windows 8/7/XP PC via a USB port and GrayWolf's WolfSense LAP software.

VOCs CO₂ CO %RH Temperature +1 more Toxic Gas

Highly accurate, extremely fast response sensors. Perfect for *both* quick walk-through surveys *and* for long-term IAQ trending.

Track VOCs over time, rapidly bloodhound VOC sources or determine optimum locations and times to take air samples for VOC speciation via lab analysis. A very powerful screening tool.

IQ-610

One specific gas sensor slot (*additional* to CO) is available on the IQ-610.

Choose from:

Ozone
 Nitrogen Dioxide
 Nitric Oxide
 Ammonia
 Chlorine
 Hydrogen Sulfide
 Sulfur Dioxide
 Oxygen
 HCN, HCl, H₂, EtO, SiH₄,
 AsH₃, PH₃, ClO₂, COCl₂,
 HF or F₂

IQ-410/ IQ-604

CO₂, CO, %RH & °C/°F
 The IQ-604 also includes sockets for 1 PID (VOCs) and 1 EC (specific gas) sensors for future upgrade.

TG-502

VOCs (PID) plus 3 specific gases, %RH & °C/°F. Choose low sensitivity (20ppm), mid (2000ppm) or high range (10,000ppm) PID.

AS-202A

Air Velocity probe (telescoping with 90° articulating tip and laser etched cm & inch scale)

FM-801

Formaldehyde (ppb HCHO)

Interface these meters to GrayWolf platforms; and/or use as stand-alones

PC-3016A

6-Channel Particulate Meter

PM-205

Particulate Concentration

A 2nd probe, or even a 3rd probe (+airspeed +DP +BP for AdvancedSense or WolfPack), may be connected simultaneously with the option to also add a particulate and/or formaldehyde meter. All parameters display and log to the same data file.

GrayWolf manufactured instruments, and tablet PCs, ideal for your application, are all available from GrayWolf. Or use your own.

More probes, sensors, display/logging platforms and software features are on the way. Expand your GrayWolf system as your measurement needs grow and as legislative requirements change.
